Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 12 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 12 includes a new limitation "movement of the first and second actuation button members is limited in the actuation direction to a distance of less than the diameter of the spring" which is not described in the original specification. There is no clear limit of the movement of the buttons relative to the diameter of the spring. The drawings only show a depression direction by an arrow 22 and 24.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Han et al (6,442,772).

Han et al discloses a dual actuation button assembly for a dual volume flush cistern comprising first and second actuation button members 198, 201 (Fig. 6), the first and second actuation button members arranged and configured to move upon actuation in a common actuation direction; a single spring (shown in Fig. 6) adapted to apply a force to each of the first and second actuation button members 198,201 in a direction opposite the actuation direction, the single spring having a diameter; and wherein movement of the first and second actuation button members is limited in the actuation direction to a distance of less than the diameter of the spring, whereby during actuation of one of the first and second actuation button members the spring maintains contact with the actuation button member that is not actuated to maintain the actuation button member in its original physical location.

Allowable Subject Matter

5. Claims 1-10 are allowed.

Response to Arguments

6. Applicant's arguments on 03/07/2007 with respect to claim 12 have been considered but are moot in view of the new ground(s) of rejection.
